Specialized care. Community focus.

If bone or joint pain is impacting your life, the surgeons at the Northwestern Medicine Surgery Center provide a range of advanced outpatient orthopaedic procedures right in your community, along with leading-edge pain management services. This modern ambulatory surgery facility is equipped with the latest high-definition, digital arthroscopic equipment and staffed by a skilled and compassionate surgical team.

Outpatient surgical procedures

Thanks to advancement in medical technology and surgical techniques, many orthopaedic procedures can be skillfully performed on an outpatient basis. The skilled surgical team at Northwestern Medicine Surgery Center performs a wide range of procedures, including:

- Advanced arthroscopy, arthroscopic repair and reconstruction
- Fracture care
- Carpal tunnel release
- Lumbar microdiscectomy
- Microsurgery
- Small joint arthroscopy and hand surgery

Pain management

You don't have to live with pain. The compassionate specialists at Northwestern Medicine Surgery Center offer a broad range of approaches to pain management to help you find relief. After careful analysis to determine the underlying cause of your pain, the skilled pain management team* will develop a personalized treatment plan for you, which may include:

- Analgesic drug pain management
- Discography
- Epidural steroid injections
- Facet joint injections—cervical, thoracic and lumbar
- Intramuscular, trigger point and sacroiliac joint injections
- Nerve block techniques

* In the spirit of keeping you well-informed, some of the physician(s) and/or individual(s) identified, are neither agents nor employees of Northwestern Memorial HealthCare or any of its affiliates. They have selected our facilities as places where they want to treat and care for their private patients.

If pain is impacting your life or you are considering an orthopaedic surgical procedure, talk to your physician about Northwestern Medicine Surgery Center.
